FitBuddy– AI Fitness Plan Generator using Gemini Models A personalized AI assistant for creating structured fitness plans

## PROJECT OVERVIEW

- FitBuddyuses Gemini models to generate personalized workout and wellness plans from user inputs.
- The system considers goals, fitness level, available time, equipment and preferences.

## MAIN GOAL

- Make fitness planning simple, accessible and personalized for beginners and regular users

Problem Statement Many people struggle to create a consistent and suitable fitness routine

CHALLENGES

• Generic workout plans may not match a person's goals, schedule or available equipment.

• Beginners may be unsure about exercise selection, workout structure and progression.

• Finding and organizing suitable workouts and routines can take time.

NEED

• An AI assistant that can turn basic user preferences into a structured and easy-to-follow fitness plan.

Key Features Core capabilities of the FitBuddy application

PERSONALIZED WORKOUT

• Generates routines based on goals such as strength, endurance, mobility or general fitness.

SMART EXERCISE SELECTION

• Suggests exercises according to fitness level, available equipment and workout time.

WEEKLY PLAN

• Organizes exercises into a practical weekly schedule with rest and recovery days.

PROGRESS SUPPORT

• Allows users to update goals and adjust routines as their training changes.

HowFitBuddyWorks A simple flow from personal information to an AI-generated fitness plan

STEP 1 – USER INPUT

Enter goal, fitness level, preferred workout type, available time and equipment.

STEP 2 – GEMINI PROCESSING

• Gemini interprets the profile and generates a structured fitness-plan response.

STEP 3 – PLAN CREATION

• FitBuddypresents workouts, exercise details, sets, repetitions and rest guidance. S

TEP 4 – USER FEEDBACK

• User can request changes such as shorter sessions, home workouts or different exercises.

Benefits & Future Scope Potential benefits and future improvements BENEFITS

- Saves time when creating a structured workout routine.
- Provides personalized suggestions based on user preferences.
- Makes fitness planning easier for beginners and busy users.

FUTURE SCOPE

- Voice-based fitness coaching and multilingual support.
- AI-generated exercise illustrations and short instructional videos.
- Progress dashboards and adaptive plans based on completed workouts.
- Integration with supported wearable or activity data, with appropriate privacy controls.
- Nutrition-planning features with suitable safety and professional-review guidance.
